

This listing of the claims replaces all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

1. **(Previously Presented)** A wireless communications device for use in a wireless network comprising:

a user interface for controlling the operations of the wireless communications device including a component to compose a destination for an outgoing communication generated by the device, said component providing simultaneously together:

a prompt for receiving the destination from a user; and

a hot list of candidate destinations from which the user may select the destination.

2. **(Original)** The wireless communications device of claim 1 including:

a key-based input device to input the destination.

3. **(Original)** The wireless communications device of claim 2 wherein the user interface comprises a home screen component from which to invoke a feature from among a plurality of features provided by the device; and wherein the component to compose a destination is invokable from the home screen component automatically in response to an input from the key-based input device of a portion of the destination.

4. **(Original)** The wireless communications device of claim 3 wherein the destination is a telephone number to be called and the input is a portion of a telephone number.

5. **(Original)** The wireless communications device of claim 3 wherein the portion of the destination populates the prompt when the component to compose a destination is invoked.

6. **(Original)** The wireless communications device of claim 1 wherein the component to compose a destination is invokable in response to at least one of: an interaction with a home screen component of the user interface from which to invoke a feature from among a plurality of features provided by the wireless communications device; and an auxiliary input device.

7. **(Original)** The wireless communications device of claim 3 wherein the component to compose a destination is further invocable in response to at least one of: an interaction with the home screen component of the user interface; and an auxiliary input device.
8. **(Original)** The wireless communications device of claim 1 wherein the component to compose a destination is navigable by a user to move between the prompt and hot list.
9. **(Original)** The wireless communications device of claim 1 wherein the component to compose a destination is adapted to provide a filtered list of destinations from a store of destinations on the device in response to a filter input by the user, said filtered list selectable by the user to choose a destination.
10. **(Original)** The wireless communications device of claim 1 wherein the prompt is adapted to permit a user to navigate and change the destination while composing.
11. **(Original)** The wireless communications device of claim 1 wherein the component to compose a destination is adapted to provide at least one action button for terminating composition of the destination.
12. **(Previously Presented)** In a wireless communications device for use in a wireless network, a method for composing a destination for an outgoing communication generated by the device comprising providing a composition screen including simultaneously together:
 - a prompt for receiving the destination from an input of a user; and
 - a hot list for selecting the destination by the user, the hot list comprising candidate destinations from which to select the destination.
13. **(Original)** The method of claim 12 including:
 - receiving the destination using the prompt in response to a key-based input from the user.
14. **(Original)** The method of claim 13 comprising:
 - providing a home screen from which to invoke a feature from among a plurality of features provided by the wireless communications device; and

invoking the providing of the composition screen from the home screen automatically in response to the input of a portion of the destination.

15. **(Original)** The method of claim 14 wherein the destination is a telephone number to be called.

16. **(Original)** The method of claim 14 comprising populating the prompt with the portion of the destination.

17. **(Original)** The method of claim 12 comprising:

providing a home screen from which to invoke a feature from among a plurality of features provided by the device; and

invoking the providing of the composition screen from the home screen in response to one of: an input of a portion of the destination; an interaction with the home screen; and an activation of an auxiliary input device dedicated to invoke the composition screen.

18. **(Original)** The method of claim 12 comprising moving between the prompt and hot list in response to navigation about the composition screen by the user.

19. **(Original)** The method of claim 18 comprising receiving the destination selected from the hotlist and generating the outgoing communication in response.

20. **(Original)** The method of claim 13 comprising providing a filtered list of destinations from a store of destinations on the wireless communications device in response to a filter input by the user, said filtered list selectable by the user to choose the destination.

21. **(Original)** The method of claim 12 comprising receiving the destination and generating the outgoing communication in response.

22. **(Original)** The method of claim 12 comprising providing a cursor adapted to permit a user to navigate and change the destination while composing.

23. **(Original)** The method of claim 12 comprising providing at least one action button for terminating composition of the destination.

24. **(Previously Presented)** A computer program product having a computer readable medium tangibly embodying computer executable code for composing a destination for an outgoing communication generated by a wireless communications device for use in a wireless network, said computer program product comprising:

code for a composition screen providing simultaneously together:

a prompt for receiving the destination from an input of a user; and

a hot list for selecting the destination by the user, the hot list comprising candidate destinations from which to select the destination.
